

5NINES DATA CENTER

5NINES'S CARRIER-NEUTRAL DATA CENTER WILL KEEP YOUR CRITICAL DATA SAFE AND SECURE.

Our data center, located at Network222 atop downtown Madison's dual-power grid, and comprising 200,000 square-feet of class-A office space, is referred to as Madison's Telco Hotel. As the city's premier carrier-neutral Internet and Wide Area Network service provider, we interconnect 20+ regional and national providers.

For over 20 years we've helped local businesses reduce their IT costs by delivering enterprise colocation, mission-critical redundancy and infrastructure monitoring. There is no better place to connect than at 5NINES.

OUR DATA CENTER SERVICES INCLUDE

CARRIER-NEUTRAL DATA CENTER

As Madison's premier carrier-neutral Internet and Wide Area Network service provider, 5NINES gives you more carrier choices than any other provider in the Madison area—20 and counting!

COLOCATION

5NINES unique physical location allows direct access to the main fiber networks serving southern Wisconsin. Just two hours north of Chicago and one hour west of Milwaukee, 5NINES is the perfect colocation spot.

CROSS CONNECTS

In today's hybrid IT world network and information security are top priorities. Eliminate hops and connect straight to the providers you need to thrive in a multi-cloud environment by ordering a simple cross-connect from you to them.

TRANSPORT SERVICES

By offering multiple carrier-neutral connections our customers benefit from ease and flexibility to connect and transport between 20+ major providers, all in one place! Our customers also save on internet bandwidth services while increasing the speed and reducing the latency of connectivity.

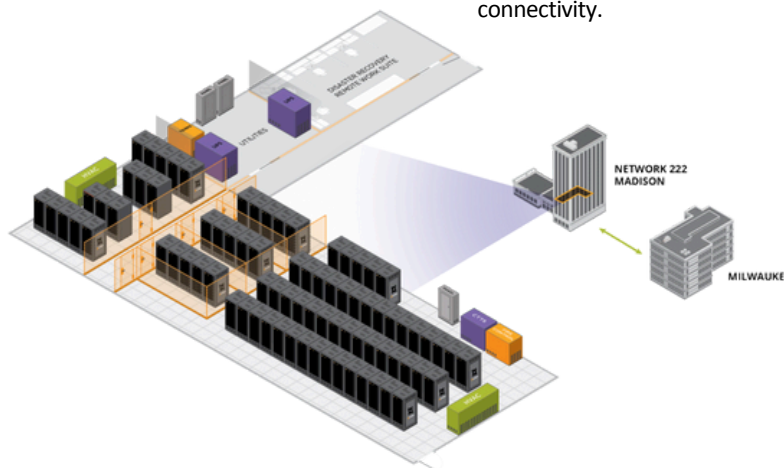

DISASTER PROTECTION

Whether it's a fire on the floor below you or a city-wide flood, a disaster can result in lost data and lost revenue from your website being offline. At 5NINES, we're prepared for the unexpected with redundant power sources, backup generators, state-of-the-art cooling systems, and a well-rehearsed disaster response plan to prevent downtime.

**20+ YEARS OF
EXPERTISE**

**99.999% UPTIME
GUARANTEE**

20+ CARRIERS

DOWNTIME IS NOT AN OPTION

Our data center provides unparalleled reliability with both a redundant power grid and a fully redundant core Internet network, ensuring your data and systems are always accessible when you need them. This sets the foundation for our 99.999% uptime guarantee.

RELIABILITY FEATURES

- A fully redundant core network with multiple, diverse Gigabit connection paths to the Internet.
- Carrier-neutral facility designed to take on traditional data center needs and Cloud services
